PROFILE

Motivated Software Developer with a genuine passion for front-end development. Self-driven learner who has independently built and deployed multiple web applications using React, JavaScript, and Node.js. Seeking a front-end or full-stack role to apply my practical skills in a professional team environment and continue growing as a developer.

PROJECTS

Movie Search App, yegost.github.io/movie-search-app

React, Tailwind, CSS

- Built a responsive SPA to search movies and explore cast/crew details via the TMDB API.
- Implemented a Favourites feature with Zustand to persist saved movies across sessions.
- Designed a clean, mobile-first UI entirely with Tailwind CSS utility classes.

Weather App, weather-app-phi-ten-60.vercel.app

React, JavaScript, CSS

- Developed a weather dashboard showing real-time conditions and a 5-day forecast for any searched city
- Integrated a public weather API with async/await data fetching and graceful error handling.
- Bootstrapped with Vite for fast dev experience and optimized production builds.

Artist Search App, artist-search-app-3dev.onrender.com

Node.js, JavaScript, HTML, CSS

- Built a server-side music discovery tool in Node.js, querying a music metadata API.
- Displays artist biography, discography, and full album tracklists in a clean layout.

SKILLS LEARNING & DEVELOPMENT

freeCodeCamp — Full Curriculum Completed

Self-study covering Responsive Web Design, JavaScript Algorithms & Data Structures, and Front-End Development Libraries (React).

LEARNING & DEVELOPMENT

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Tools: React, Node.js, Tailwind CSS, MySQL

Dev Tools: Git, GitHub, VS Code
